11251 rows × 15 columns

```
- Our Variable Features:
```

-User_ID: Unique number of each user.

-Cust_name: cust name of users.

-Product_ID: Unique number of each product.

-Gender: F= Female, M= Male.

-Age Group: Age lies between this numbers.

-Age: Age of users.

-Marital Status: 0= unmarried, 1= married.

-State: Name of states.

-Zone: Name of zones.

-Occupation: Work place of user.

-Product_Category: Type of product.

-Orders: total number of orders.

-Amount: Total Amount/Bill of product.

-It is an diwali data of customers. cutomers from diffrent states and zone. category of product, product type. -Every costumer has diffrent userID and productID. After visualizing data it shows that female puchasing power is more that male, and people with IT occupation spent more money then other occupation.
